

**Training demonstration on techniques *in-vitro* cultivation of *P. falciparum* for
scientific researchers during 2-3rd Dec 2026 at ICMR-NIMR campus.**

A training demonstration on “*in-vitro* techniques for *P. falciparum*” is scheduled during 2-3rd Dec 2026 for researchers in the relevant field (Government Institutions, ICMR Institutes, Universities, Academic Colleges etc.) (seats available for 20 candidates).

The successful *in-vitro* cultivation malaria parasite not only increases the understanding of parasite biology but also easily provide the means to examine compounds against the target species, or an acceptable experimental model. It allows for a better understanding of the mechanism of parasite invasion, biochemistry, physiology, chemotherapy, drug resistance, and immunology. The objective of the present training is to demonstrate the basic principles of the cultivation of the asexual stages of *P. falciparum*. This will help in understanding of *in-vitro* requirements and development of long-term cultivation techniques or successful continuous *in-vitro* cultivation of *P. falciparum*.

Two days training will involve lectures from faculties and demonstrations in the noon sessions.

The applied candidates will be entertained on first come basis (no fees involved, no TA/DA, no accommodation provided).

The selected candidates will be informed by email and the agenda will be shared shortly will them with all the details.

The interested candidates can send their request in filled prescribed format and email the filled format to:
